PROFILE SUMMARY

Python Developer with hands-on experience in building backend systems, automation workflows, and data-driven applications using Python, FastAPI, Flask, SQL, and MongoDB. Currently working as a Trainee Python Developer at Cygnus Software with exposure to AI-powered automation, ETL workflows, and backend API development. Strong understanding of algorithms, database operations, and system integration. Adept at converting business requirements into efficient backend logic and scalable solutions.

TECHNICAL SKILLS

- **Programming & Backend** : Python, Flask, FastAPI, MySQL, PostgreSQL, SQL Server and MongoDB
- **Core Concepts**: Data Structures, OOPS, REST API Development, ETL, AI Automation
- **Frontend Exposure**: HTML, CSS, Bootstrap, React
- **Tools & Platforms**: Git, Railway, VS Code, Cursor, Microsoft Office
- **Other Skills**: JSON, Agile Methodologies

ADDITIONAL SKILLS

- Video Editing (DaVinci Resolve)
- Photo Editing (Canva)

PROFESSIONAL EXPERIENCE

Trainee – Python Developer
Cygnus Softwares

June 2025 – Present
Coimbatore, Tamil Nadu

Backend & API Development

- Developed backend APIs using Python FastAPI and Flask for web and desktop applications.
- Implemented authentication, CRUD operations, and database integration using SQL and MongoDB.
- Worked on automating data extraction, database updates, and ETL tasks using Python.

Involvement in AI & Automation

- Built automation pipelines that extract information from emails, classify data using AI, and generate automated responses.
- Contributed to systems involving speech-to-text processing, accessibility analysis, and backend-driven data workflows.
- Implemented intelligent ETL workflows that ingest large CSV/TSV files, apply AI-driven classification and SQL-based transformations, and load refined data into target databases with minimal manual intervention

Technical Analysis and Testing

- Performed requirement analysis and performed the Unit and functional testing.
- Conducted testing of Python systems, debugging issues, and supporting deployments.

EDUCATION

B.E. – Computer Science and Engineering

RVS College of Engineering & Technology
CGPA : 8

2021 – 2025
Coimbatore, Tamil Nadu

Candor Data Platform

Tech Stack: *Typescript, Python FastAPI, MySQL and PostgreSQL*

Worked on a desktop ETL platform that lets users visually define, configure, and run complete data pipelines, supporting both database-to-database and file-to-database loads with automated schema handling, datatype mapping, and performance-optimized bulk loading.

Sales Enquiry

Tech Stack: *React, Python FastAPI and MySQL*

Worked on a hotel sales-enquiry automation system that reads inbound emails from hotel inboxes, classifies them using AI, extracts key details (dates, pax, requirements), and sends acknowledgement and manager summary emails automatically

ADA Checker Web Application

Tech Stack: *React, Python FastAPI, JavaScript*

Worked on an ADA Checker web application that scans websites for ADA and WCAG accessibility violations. Built a FastAPI backend to audit URLs and generate detailed, actionable accessibility reports. Created a React dashboard to display issues, severity levels, and recommended fixes for developers.

ATM Transaction Web Application

Tech Stack: *React, Python Flask, SQL*

Developed a web application simulating ATM operations, including login, balance checking, deposits, withdrawals, and transaction history.

Sign language and Subtitle Generation System

Tech Stack: *HTML, CSS Javascript, Python flask*

Developed an intelligent system that converts spoken audio into text and then translates that text into sign-language animations. The application processes uploaded videos or live audio, extracts speech using speech-to-text models, and generates dynamic sign-language representations.

CERTIFICATIONS

2022 – 2024

- Programming in Java – Elysium (Internship Certificate)
- Web Development – EZIO Skill Academy
- Web Development – ICT Academy (Virtual)
- Programming in Java – NPTEL (65%)
